Little Boy Blue Double

The Little Boy Blue Double, produced in May 2007 in a special edition of five pieces, features the functionality of two LBB Standard, a noise generator, and a “Mysterious Reactor”, all in a single, AC-powered case.

Features

4 voltage-controlled oscillators (mix of saw, inverted saw, and triangle)

2 separate preamps

2 envelope followers with optional inverters

Bright and Dark noise outputs

Master Volume

4-node “Mysterious Reactor”

Supplied with 14 patch cables

Power: 120 VAC, 10 Watts max. (Can also be configured for 220 V operation by an internal jumper.)

Noise Generator

The Battery Powered Noise Generator runs on one 9v battery. Current drain is extremely low, typically offering several months of operation. Construction is rugged, for a road-worthy, dependable tool. This is the noise solution you've been looking for!

Features

Musical noise spectrum (using hand-selected noise transistors)

Boost switch for enhanced feeling of doom

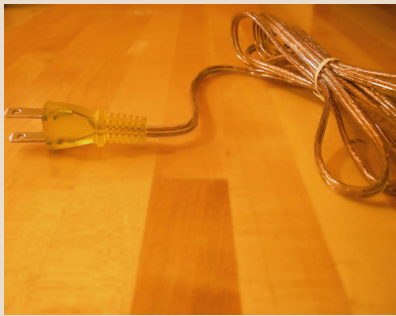

Rugged construction

Ultra-low current drain

Power is connected only when output cable is plugged in — conserving battery life

Supplied with 9-V battery (installed) & BPNG Fact Sheet
